Reading

۱۳- متن هر قسمت را بخوانید و با توجه به مفهوم، گزینه صحیح را انتخاب کنید.

We can thank Allah by keeping our body healthy. One way to do that is eating healthy food and doing daily exercises. Another way is to donate our blood to those who need it.

41) According to the above sentences,

a) all people need to donate their blood

b) donating blood keeps your body healthy

c) healthy food is not important at all

d) most people never thank Allah

Alfredo is an Italian tourist. He lives in Rome. He likes to travel and see different places of the world. He takes photos especially of animals. Next month, he and his wife are going to travel to Iran. They are hopeful of seeing Persian zebra, Iranian cheetah, Persian leopard and gazelle.

42) We understand from the above paragraph that

- a) Alfredo takes only pictures of wild animals
 - b) Alfredo's wife will not visit Iran next month
 - c) Alfredo will take pictures of animals in Iran
 - d) there are no wild animals in Alfredo's country
-

When you keep nature clean and safe, the animals will live longer. Protecting the trees of forests is also helpful. If you live in a village, you need to be very careful about the hunters who come to your village to hurt animals. Whenever you see these people, you need to call the police.

43) According to the above sentences,

- a) many hunters live in villages
 - b) the police call the hunters every day
 - c) hunters are careful about nature
 - d) people can help protect nature
-

There are so many different types of microbes. We still don't really know how many there are, but we know that microbes do lots of different things. Bacteria and viruses are two important types of microbes.

44) The above paragraph says

- a) we know the number of microbes
- b) there's only one kind of microbe
- c) a virus is a kind of microbe
- d) viruses are very important for us

Just think of a big cat, faster than any car you've ever seen! That's an Iranian cheetah for you! They live in a country called Iran, a place full of deserts. They eat other animals especially gazelles.

Iranian cheetahs have black spots all over their body, like a beautiful coat of stars. It helps them hide when they want to hunt gazelles. Did you know that they can reach speeds of up to **110** kilometers per hour? That's really fast!

These cheetahs are special because they're endangered, which means that you can find only a few of them around you. That's why people are working really hard these days to protect them and their home. They build special **areas** where cheetahs can live safely, away from danger.

So next time you see a cheetah in a book or on TV, remember the special Iranian cheetah! They are beautiful and powerful creatures that need our help to stay safe and keep running free.

❖ **True / False**

45) Iranian cheetahs can run very fast. **A) True** **b) False**

46) Iranian cheetahs live in forests. **A) True** **b) False**

❖ **Choose the best answer.**

47) Iranian Cheetahs are endangered because

- a) they kill other animals

 c) they live in different places

48) The underlined word "areas" is closest in meaning to

- a) places** **b) foods** **c) things**

❖ **Answer the following questions.**

49) How does the cheetahs' coat help them?

It helps them hide when they want to hunt gazelles.

50) Why are people working hard these days?

People are working really hard these days to protect cheetahs and their home.

Our bodies are made up of different types of cells. Blood carries oxygen and food to all of the cells in our body. Blood carries wastes away from the cells. Blood also helps to protect the cells. Blood is made up of red cells, white cells, platelets and plasma. There are different types of white blood cells, but all white blood cells have the same job: They all help our body fight disease and infection.

Some white blood cells attack germs, or bacteria. The white blood cells find bacteria easily. When a white blood cell finds them, it starts to engulf them. When something is engulfed, it is covered completely.

Other white blood cells produce, or make antibodies. Antibodies help our body fight against diseases. Other types of white blood cells move freely around the body. The attack and engulf tiny invaders (or attackers). You cannot see the invaders without a microscope. The invaders are: bacteria, viruses and old, dead cells.

❖ True / False

51) White blood cells are not useful at all. A) True **b) False**

52) Antibodies make us unhealthy. A) True **b) False**

❖ Choose the best answer.

53) The underlined 'it' in paragraph 2, refers to
a) a white cell b) something c) blood d) our body

54) Which one is correct according to the passage?

- a) There are only red and white cells in blood.
- b) Some bacteria attack white blood cells.**
- c) Blood can't carry wastes away from the cells.
- d) Some white blood cells make antibodies.

❖ Answer the following questions.

55) What is blood made up of?

Blood is made up of red cells, white cells, platelets and plasma.

56) What do all white blood cells do?

They all help our body fight disease and infection.
